Raisin in the Sun Study Guide 2001-12-01 constituent and pattern in poetry is a collection of essays on literature and language it is built on the assumption that works of literature have existence in the real world and that they may be analyzed in a fashion that is not totally subjective using models derived from structural linguistics archibald a hill presents a number of theoretical contributions to the study of poetry as well as new ways of looking at specific poems the book as a whole provides an overview of the tools and ideas hill has developed for analyzing works of literature and it is the first time the essays have been gathered together in one volume the book is divided into three sections definition of literature and study of its patterns types of meaning and imagery and principles for interpreting meaning each section opens with a theoretical essay followed by three essays that work analytically with specific poets and poems using the methods defined in the first in his examination of such poets as hopkins browning milton blake keats and dickinson hill uses such proposals as the law of least lexical contribution and maximal contextual contribution the hypothesis that when possible meanings occur together in a cluster they support each other and the idea that it is sometimes possible to recover underlying language sequences from which the author has departed for identifiable reasons by applying these suppositions to the study of particular poems hill shows how the reader may arrive at statements about the relative artistic merit of works of literature

Hamilton Literary Magazine 1886 in the eighteenth century literature meant learned writings by the twentieth century literature had come to be identified with imaginative aesthetically significant works and academic literary studies had developed special protocols for interpreting and valuing literary texts literature in the making examines what happened in between how literature came to be more precisely specified and valued how it was organized into genres canons and national traditions and how it became the basis for departments of modern languages and literatures in research universities modern literature the version of literature familiar today was an international invention but it was forged when literary cultures traditions and publishing industries were mainly organized nationally literature in the making examines modern literature s coalescence and institutionalization in the united states considered as an instructive instance of a phenomenon that was going global since modern literature initially offered a way to formulate the value of legacy texts by authors such as homer cervantes and shakespeare however the development of literature and literary culture in the u s was fundamentally transnational literature in the making argues that shakespeare studies one of the richest tracts of nineteenth century u s literary culture was a key domain in which literature came to be valued both for fuelling modern projects and for safeguarding values and practices that modernity put at risk a foundational paradox that continues to shape literary studies and literary culture bringing together the histories of literature s competing conceptualizations its print infrastructure its changing status in higher education and its life in public culture during the long nineteenth century literature in the making offers a robust account of how and why literature mattered then and matters now by highlighting the lively collaboration between academics and non academics that prevailed before the ascendancy of the research university starkly divided experts from amateurs literature in the making also opens new possibilities for envisioning how academics might partner with the reading public
